***Welcome to OpenStreetMap**, the project that creates and distributes free geographic data for the world. We started it because most maps you think of as free actually have legal or technical restrictions on their use, holding back people from using them in creative, productive, or unexpected ways.*

show

An Adit is an entrance to an underground mine which is horizontal or nearly horizontal.

Tagging

- `man_made=adit`

The adit itself.

- `resource=*`

What is mined for with the adit. Visit the resources page to view a list of possible values.

- `mine=*`

The name of the mine which the adit is a part of.

- `operator=*`

The operator of the adit, usually the operator of the surrounding mine.

- `depth=*`

Length in meters.

- `name=*`

The name of the adit.

- `disused=*`

If the mineshaft is not in use anymore.

- `collapsed=*`

If the mineshaft is already collapsed.

All this tags can be used on a single node.

man_made = adit

v • d • e

Description

An adit is a type of entrance to an underground mine which is horizontal or nearly horizontal

Used on these elements

Useful combination

- Key:operator
- Key:name
- Key:resource
- Key:disused

Template agreement

Note: This a template and needs to be completed together with the Foundation for applying organsiations.

OpenStreetMap Foundation Local Chapters Agreement

Preamble

The OpenStreetMap Foundation is an international non-profit organisation supporting but not controlling the OpenStreetMap project. It is dedicated to encouraging the growth, development and distribution of free geospatial data and to providing geospatial data for anybody to use and share. OpenStreetMap Foundation local chapters are not-for-profit organizations, which operate in a specific geographical region and support the aims of the OpenStreetMap Foundation. This agreement constitutes the formal recognition of an organization as an OpenStreetMap Foundation Chapter and defines the rights and obligations of both the OpenStreetMap Foundation and the OpenStreetMap Foundation Chapter.

1. Identity of the Parties

OSM Foundation Local Chapters:

Got its inspiration from the Local Chapters framework of the Wikimedia Foundation

Weybridge

From Wikipedia, the free encyclopedia

This is an old revision of this page, as edited by 80N (talk | contribs) at 00:39, 20 March 2006 *(Add map from openstreetmap.org)*. It may differ significantly from the current revision.

(diff) ← Previous revision | Latest revision (diff) | Newer revision → (diff)

Weybridge is a town in the Elmbridge district of Surrey in South East England. It is bounded to the North by the River Thames at the mouth of the River Wey, from which it gets its name.

History

The early history of Weybridge was simply as a river crossing. In 1537 it became the location of Oatlands Palace built by Henry VIII. When it was demolished in 1650, bricks from its walls helped to line the then new Wey Navigation. Part of the original site of the Palace is now occupied by Oatlands Park Hotel.

At the bottom of Monument Hill, close to the town centre is a monument to the Duchess of York, erected by public subscription in 1820 from the remains of the original Seven Dials Monument that stood in St.Martin's Lane London until 1773.

City of London

From Wikipedia, the free encyclopedia

Coordinates: 51.5155°N 0.0922°W

This article is about the historic city and financial district within London. For the capital city of England and the United Kingdom, see London. For other uses, see City of London (disambiguation).

The **City of London** is a city and county within London. It constituted most of London from its settlement by the Romans in the 1st century AD to the Middle Ages, but the agglomeration has since grown far beyond the City's borders.[4] The City is now only a tiny part of the metropolis of London, though it remains a notable part of central London. Administratively, it forms one of the 33 local authority district of Greater London; however, the City of London is not a London borough, a status reserved for the other 32 districts (including London's only other city, the City of Westminster) .

The City of London is widely referred to simply as *the City* (differentiated from the phrase "the city of London" by capitalising *City*) and is also colloquially known as the *Square Mile*, as it is 1.12 sq mi (2.90 km^2)[5] in area. Both of these terms are also often used as metonyms for the United Kingdom's trading and financial services industries, which continue a notable history of being largely based in the City.[6] The name *London* is now ordinarily used for a far wider area than just the City. *London* most often denotes the sprawling London metropolis, or the 32 London boroughs, in addition to the City of London itself. This wider usage of *London* is documented as far back as 1888, when the County of London was created.[7]

The local authority for the City, namely the City of London Corporation, is unique in the UK and has some unusual responsibilities for a local council, such as being the police authority. It is also unusual in having responsibilities and ownerships beyond its boundaries. The Corporation is headed by the Lord Mayor of the City of London, an office separate from (and much older

OPEN CONTENT IN KALIMANTAN – WIKIPEDIA & OPENSTREETMAP FOR TRANSPARENCY

Country of implementation: Indonesia

Awarded: £31, 210

Period: 12 months

Making All Voices Count has partnered with **Perkumpulan Wikimedia** to develop an open toolkit for creating and using the internationally recognised toolsets Wikipedia and OpenStreetMap at the micro/local level – in this case, Kalimantan. The project reflects Wikimedia Indonesia's and the Humanitarian OpenStreetMap Team's commitment to the growth of open content in Indonesia and will train local communities and government to produce their own content, document their knowledge and map capacity in their localities. Rather than build a completely new toolset, this project takes existing tools and uses them to create local content.
