Jonathan,

With reference to your enquiry below, I am pleased to advise that as this data is publicly available on the TfNSW website, it is already available to those who access the TOC Manual on-line. However, the use of this information by any third party is at their own risk, and TfNSW shall not be responsible for any issues arising from the use of this data. Please also note that the published data is subject to change from time to time.

Regards,

Michael Uhlig

Hi there team,

I recently joined the OpenStreetMap community and have been keen to add the Speed limits for the Sydney Trains network onto the map.

I've found the TOC Manuals recently and can see they have all the speed data for the train lines, however I don't want to be infringing on the Copyright for this information.

Is there a way I can get permission to use this data for OSM so it can look just as awesome as it does in Victoria (ideally for the whole OSM community)? Or is there another way I can source this data, such as OpenData?

Appreciate any help you can provide!

Thanks,  
Jonathan Le Mesurier

Thank you for that Michael, that's really helpful.

So just to be absolutely clear, could you please state for the record that it is permitted to add information derived from these documents to the OSM database, with no liability or responsibility for correctness on your part?

Thanks,  
Jonathan (OSM: jMapsAu)
